Answer all of the following questions. Follow the guidelines discussed in class. Write your answers in the spaces provided.

1. A boy ate 100 cookies in five days. Each day he ate 6 more than the day before. How many cookies did he eat on the first day?
 2. Taylor works at the Fantasy in Flight Factory. He checks all the kites made in the factory before they are packaged. One day Travis discovered that for every 30 kites that passed inspection there were 7 kites that didn't pass: 4 kites without tails and 3 kites with the wrong colors. Of the 296 kites Travis examined how many didn't have tails and how many had the wrong colors?
 3. The Chen family has one grandmother and one grandfather, five mothers and five fathers. Each mother has three daughters and each daughter has two brothers. The grandmother has only one daughter-in-law. What is the fewest members of the Chen family there could be?
-

Next time, make sure you work on...

Re-writing and simplifying the question.	Organizing & formatting your calculations.	Organizing and labeling your diagrams or charts.	Explaining why you chose your strategy.	Including labels or descriptions that help explain your work.	Editing your work so that it is neat and organized.
